

– Software Requirement Specification (SRS)

1. Introduction

1.1 Purpose

The purpose of this document is to define the complete functional and non-functional requirements for **App**, a mass-market job and services marketplace for India. This document is intended for founders, developers, designers, QA teams, and stakeholders.

1.2 Product Vision

App enables **individuals and businesses** to hire **urban helpers and professionals** through direct hiring or open job posting, while allowing workers to discover, negotiate, and accept jobs via a dedicated tasker app.

1.3 Scope

- Two mobile applications:
 - Client App (Individuals & Businesses)
 - Tasker App (Helpers & Professionals)
 - One Admin Web Panel
 - Initial launch: Android, single city
-

2. User Types

2.1 Clients

- Individual Clients (household & personal jobs)
- Business / Corporate Clients (contract & professional hiring)

2.2 Workers

- Taskers (helpers, skilled workers, gig workers)
- Professionals (certified, experienced workers)

2.3 Admin

- Platform administrators
 - Support & verification team
-

3. Client App Requirements

3.1 Onboarding

- Splash screen with branding
- Language selection
- Introductory videos (max 3)
- Login via mobile OTP, Google, Apple

3.2 Client Type Selection

Mandatory selection: - Individual - Business

The selected type controls UI, job posting fields, and dashboards.

3.3 Home Screen

Individual Client Home - Search bar - Hire Now button - Post a Job button - Service categories grid

Business Client Home - Post Job - Search Professionals - Active Jobs - Saved Candidates

3.4 Job Posting

Fields: - Job Title - Job Type (One-time / Hourly / Contract) - Description - Location (On-site / Remote) - Budget or Salary Range - Skills Required - Certificate Requirement (optional) - Duration

Jobs become visible to relevant taskers/professionals.

3.5 Hiring Modes

Mode A: Direct Hire - Browse profiles - Filter by skills, ratings, price, availability - Chat → Confirm

Mode B: Job Post - Taskers apply - Client shortlists - Chat → Hire

3.6 Chat & Communication

- In-app text chat
 - File sharing (CVs, certificates)
 - Masked voice calling
-

3.7 Payments

- UPI, Debit/Credit Cards, Wallet
 - Escrow holding system
 - Milestone-based payments for contracts
 - Invoices for business clients
-

3.8 Feedback & Closure

- Rating (1–5)
 - Written review
 - Rehire option
 - Issue reporting
-

4. Tasker App Requirements

4.1 Registration & Verification

- Mobile OTP login
- Profile photo
- ID proof upload
- Address
- Bank / UPI details

4.2 Professional Verification (Optional)

- CV upload
 - Certificate upload
 - Experience details
 - Admin approval required
-

4.3 Profile Setup

- Skills selection
 - Job preferences (Gig / Contract / Both)
 - Availability schedule
 - Expected pay
-

4.4 Job Discovery

- Nearby jobs
 - Contract jobs
 - Recommended jobs
 - Saved jobs
-

4.5 Job Handling

- Apply / Chat
 - Accept job
 - Start job
 - Update progress
 - Complete job / milestone
-

4.6 Earnings & Wallet

- Available balance
 - Pending payouts
 - Withdrawal to bank / UPI
 - Payment history
-

5. Admin Panel Requirements

5.1 User Management

- Approve / reject taskers
- Verify professionals
- Suspend users

5.2 Job Management

- View all jobs
- Moderate job content
- Reassign or cancel jobs

5.3 Payments & Finance

- Commission configuration
- Payout processing
- Refund handling
- GST reports

5.4 Disputes & Support

- Ticket system
- Chat access
- Resolution logging

5.5 Analytics

- Daily active users
 - Jobs posted & completed
 - Revenue metrics
 - City-wise data
-

6. Non-Functional Requirements

- Secure authentication & encryption
 - Scalable backend architecture
 - High availability
 - Performance under peak loads
 - Data privacy compliance
-

7. Assumptions & Constraints

- Initial launch in one city
 - Android-first approach
 - Manual verification in early stages
-

8. Future Enhancements

- Subscription plans
- Profile boosting
- Insurance coverage
- Multi-language expansion
- AI job matching
